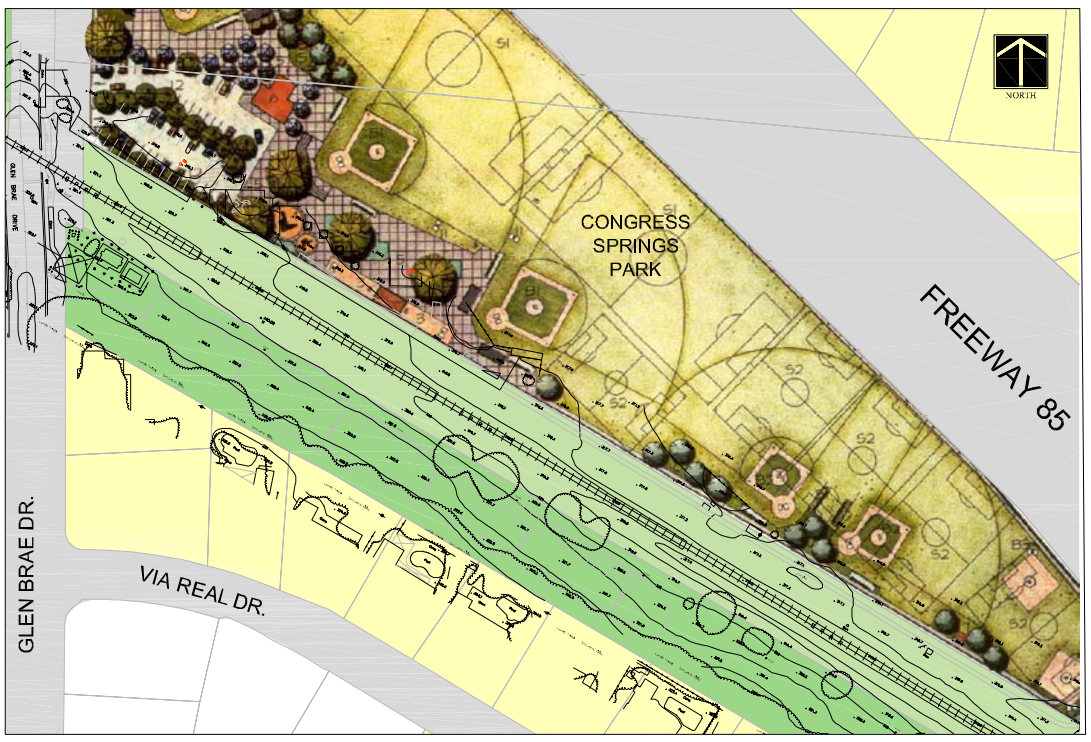
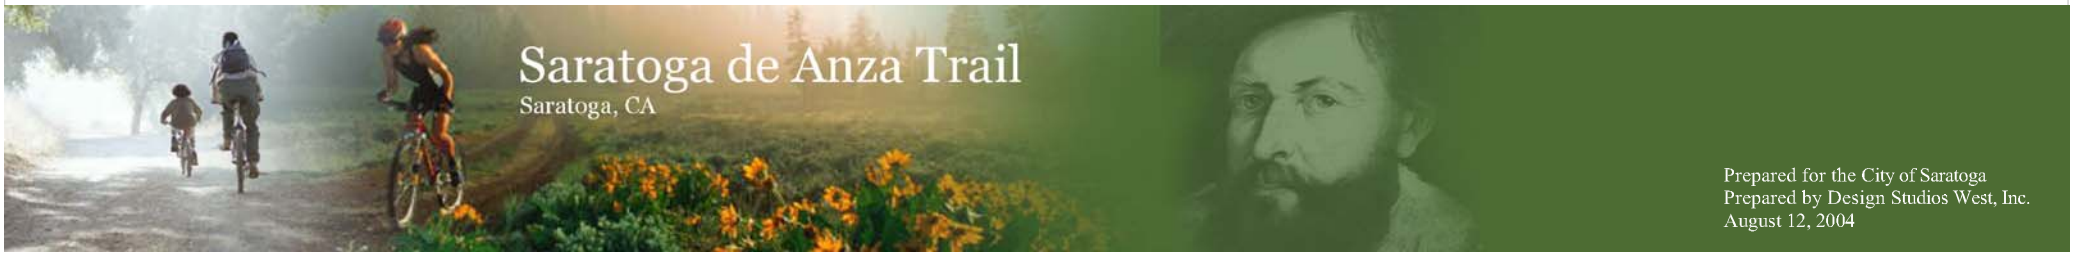
CONGRESS SPRINGS PARK

Issues:

- Primary trailhead parking for the trail is occupied during peak sporting events which could promote trail user parking in neighborhoods
- Parking to Park pedestrian traffic creates potential cross-trail conflicts/ safety hazard
- Parking to Park and Trail to Park pedestrian traffic creates potential cross-railroad tracks conflicts/ safety hazard

Potential Solutions:




- Provide additional trailheads/ trail parking at Cox Avenue and/or Saratoga Sunnyvale Road
- Provide safety fencing/ railing between trail and railroad tracks to direct and consolidate parking lot pedestrian traffic to Glenbrae Drive or select crossing points
