

Quito Road Bridges Replacement Project

Open House

Design

FAQs

Question

Are there any limits to the design of the bridge?

Answer

There are no limits in terms of aesthetics, but there are standard structural and safety design requirements that must be met.

Question

Will the project change the character of Quito Road?

Answer

The goal is to keep the rural character of the area. The City is looking to the public to guide us towards final design.

Question

How can residents help with the project design?

Answer

Comments collected from residents on bridge railings, retaining walls, fences, pathways, trees, and landscaping are features of the project that will highly influence final design.
