Environmental

FAQs

Question

Will the project change the character of Quito Road?

Answer

No. The goal is to keep the rural character of the area by saving significant trees and enhancing the natural area around the project.

Question

How many trees will be removed as a result of the project?

Answer

21 trees. The primary direction of project is to enhance the natural area around the two bridges by planting new trees and other native plants onsite.

A secondary plan is to plant trees at another location to compensate for tree removal. A location has been identified in Los Gatos about half a mile from the project site.

Question

Are there any additional environmental enhancements connected to the project?

Answer

Yes. Bio-swales and other water treatment methods will be constructed as part of a clean water plan.
