

Quito Rd Bridges Project – Environmental

Public Comments/Concerns (Open House April 2014)

- Clean creek in project area (up to Pollard)
 - Contact SCVWD regarding erosion along creek @ Arroyo Rinconada (L.C.)
- On southwest side of south bridge, target as large and mature of trees to plant as possible to vegetate that area quickly
- Can lines go underground at north bridge?
- Consider a higher proportion of deer-resistant natives
