

## Quito Rd Bridges Project – Design

### Public Comments/Concerns (Open House April 2014)

- Maintain rural atmosphere
- Don't straighten Quito Rd too much, thus speeding traffic higher
- What is being done to slow down traffic on Quito
- Concern over undermining of large trees near bridge closer to Vessing (Sycamore and Oak)
- Concern over proposed width of bridges taking away rural character
  - Prefer separation of pedestrian bridge
- Keep old pedestrian bridge adjacent to bridge 114
- Concern RE: deer that follow creek at bridge area
- Add decoration to actual bridge barrier - something adobe like
- Sidewalk from Old Adobe to Vessing
- Walkway to Marshall Lane Elementary School
- Tagging prevention on smooth cement walls
- Plant no Rhamnus / coffee berry
- What will happen to the original columns? Will they be preserved or tossed?
