

# SARATOGA-SUNNYVALE ROAD LINKAGE

## Issues:

- Provide linkage of the trail to existing Saratoga Sunnyvale Road sidewalks and bike lanes to provide access to Saratoga Gateway commercial district
- Trail improvements could encourage Saratoga Sunnyvale Road crossing hazard
- Primary trail user parking distantly designated at Congress Springs Park could promote trail user parking in business lots and neighborhoods
- Plan for long-term extension of trail to the north along the water conduit easement and railroad right-of-way (after rail abandonment)

## Potential Solutions:

- Provide landscape and other site improvements (fencing/ railing) to direct trail users away from Saratoga Sunnyvale Road crossing to Seagull signalized intersection crosswalks
- Provide trailhead parking with access from Saratoga Sunnyvale Road
